

Our strategy for

ACHIEVING NET ZER

A key focus in our commitment to sustainability leadership is achieving net zero Scope 1 and Scope 2 GHG emissions intensity by 2035, inclusive of future acquisitions.

We will continue to allocate capital and dedicate resources to meaningful, economic emissions abatement and revenue-creating projects.

Advanced Emissions Assessment

Better understand our emissions profile and adopt consistent industry methodology

Operations Excellence

Utilize technology, best practices and energy efficient operations to reduce emissions

- **Emissions performance** baseline
- Emissions data limited assurance by third party (continued, annual)
- Announced net zero emissions goal with interim targets
- Initiated responsibly sourced gas (RSG) certification for all gas assets
- Joined Veritas
- **Acquired Vine Energy**

- First company to certify two major shale basins; all gas assets 100% RSG
- Invested \$30 million on ESG and emissions reduction program (2021 and 2022)
- Achieved GHG and methane emissions reduction interim targets
- Acquired Chief, divested Powder River Basin asset

- **Established Appalachian** Methane Initiative
- Announced lower GHG and methane emissions intensity interim targets
- Extended our interim and net zero targets to include Scope 2 GHG emissions
- Joined OGMP 2.0

Credibility and Transparency

Independent verification of processes with transparent disclosure of measurable progress

Innovation

Adopt technology and engage in partnerships and investments to support a lower carbon future

Goal to achieve net zero emissions through reductions and offsets
